HEAT4ALL ICONIC EXTREME LINE

Product Catalogue

Nice to meet you...

cozy warmth - atmospheric light

FOLLOWING IN THE FOOTSTEPS OF THE SUN

Our Heat4All ICONIC ExtremeLine Infrared Heaters provide cozy warmth following the principles of nature. Infrared energy directly warms bodies, without significantly warming the surrounding air. Heat is therefore provided exactly where it is needed. Due to the atmospheric permeability, the infrared energy can be sent out to distances of up to four meters with hardly any energy losses while being especially skin-friendly.

Our innovative Heat4All ICONIC ExtremeLine infrared heaters mimic the attributes of the sun's heat rays in order to provide you with a maximum of comfort and cozy warmth. As our heaters send out heat in the ideal infrared spectrum, their radiation is not only especially comfortable on human skin, but also especially skin-friendly.

The even radiation, the possibility to set different performance levels as well as the elegant, discreet design of our Heat4All ICONIC ExtremeLine Infrared Heaters will make sure you will be comfortable in every regard.

THE CONCEPT OF THE HEAT4ALL ICONIC EXTREME LINE

Heat4All ICONIC Heat Tube Triple Combo

Concept and Fields of Application

The Heat4All ICONIC ExtremeLine is a future-oriented concept. Energy efficiency, sustainability and innovation play a major part in their design and production. Our Heat4All ExtremeLine Infrared Heaters are exclusively developed and produced in Germany. By using weather-resistant components according to the VDE standard as well as non-corrosive aluminum, our heaters are especially well-suited to be used in roofed outdoor areas. They may even be used on beaches and in coastal environments.

Some potential fields of application are ...

- Roofed outdoor areas
- Old buildings
- Heritage and historic buildings
- Winter gardens
- Terraces
- Balconies and porches
- Stables
- Gastronomically used outdoor areas
- Pergolas
- Work places
- Wellness and spa areas
- Event locations
- Smoking areas
- and many more ...

Heat Distribution

The distribution the radiation heat provided by our Heat4All ICONIC ExtremeLine Infrared Heaters depends on various factors. The mounting position as well as environmental factors, such as wind or exterior temperature, are especially crucial.

Ideally, the heaters are mounted at a height of 2 to 2.5 meters. They should be set to directly face the people the heat is provided for. Even though draughts do not influence infrared radiation, the perceived temperature is lower in places exposed to wind. Our Heat4All ICONIC ExtremeLine Infrared Heaters therefore work best in areas which are closed on at least three sides. They can also be used in unprotected areas, however, the environmental factors mentioned above may influence their performance in these areas.

Heat4All ICONIC Heat Tube Carbon titan

The Advantages of our Heat4All ICONIC ExtremeLine Infrared Heaters

Dark Emitters (Heat Zone)

- No light emission
- Full performance after only 10 min long warm-up phase
- Temperature easy to regulate
- High radiation ratio due to high surface temperature of 360 degrees Celsius
- Precise radiation characteristics

Bright Emitters (Heat Shine, Heat Tube, Heat Tower)

- Almost no light emission
- very short warm-up phase (35 seconds)
- 1,100 degrees Celsius filament temperature for a very high radiation ratio
- Replaceable carbon tube
- Specially adjusted reflector with high reflection

Shared Advantages

- Even heat distribution
- Comfortable climate
- Low heat losses
- High energy efficiency
- Precise adjustment
- Heat protection
- Integrated on/of switch
- Simple controls including temperature and timed control
- good CO² balance

On the following pages we would like to invite you to explore our Heat4All ICONIC ExtremeLine models. We are confident that their innovative technology and beautiful design will convince you.

HEAT4ALL ICONIC HEAT ZONE

Dark emitter for winter gardens & co.

Heat4All ICONIC Heat Zone

The Heat4All ICONIC Heat Zone Dark Emitter is the ideal heating solution for your indoor areas, closed winter and summer gardens, as well as industrial buildings. Its simple but elegant design suits any setting and several performance levels ensure it will make you will feel cozily warm at any time. The Heat4All ICONIC Heat Zone Dark Emitter is available in black as well as white. Various available mounting accessories and control elements will further enhance your heating experience.

Heat4All ICONIC Heat Zone

MOUNTING ACCESSORIES

Mounter

A standard mounter and a joint piece are included in all Heat4All ICONIC Heat Zone deliveries.

Any further mounting or control accessories can be ordered at additional costs.

*only for ceiling mounting

HEAT4ALL ICONIC HEAT SHINE

Highest performance in your outdoor areas

Heat4All ICONIC Heat Shine

ANDROID

The Heat4All ICONIC Heat Shine Bright Emitter is especially suited for outdoor areas which are problematic to heat using common heat radiators, for example open porches or areas which are exposed to draughts and moisture. The Heat4All ICONIC Heat Shine can be mounted on walls or ceilings and guarantees a high heating performance while being energy efficient and generating almost no red light effect.

MOUNTING ACCESSORIES

Mounter

A standard mounter and a joint piece are included in all Heat4All ICONIC Heat Zone deliveries.

Any further mounting or control accessories can be ordered at additional costs.

HEAT4ALL ICONIC HEAT TUBE TRIPLE COMBO

Light and warmth in synergy

The Triple Combo includes wireless controls via ExRemote.

Our Heat Tube Triple Combo, featuring two Heat Tubes facing outwards at 30° each as well as one LED Tube, is especially popular among our customers. While the LED Tube guarantees perfect lighting, the two Heat Tubes provide comfortable warmth. Brightness and light colour of the LED Tube as well as the preferred performance level of the Heat Tubes can be set using the same remote control.

HEAT4ALL ICONIC HEAT TOWER

Flexible warmth wherever you need it

The special advantage of the Heat4All ICONIC Heat Tower lies in its flexibility. The handy infrared heater can be quickly moved to any place you like without any mounting effort and will reach its full performance after only 35 seconds. It is especially suited for heating seating areas in draughty outdoor areas.

CONTROL SYSTEMS

The Heat4All ICONIC Heat Tower may be turned on or off using a switch on its back. There are two performance levels to choose from - 1,800 W as well as 2,700 W.
