

Gas Price Crisis!

Oil Price Crisis!

Heat pump availability problems!

Where do we go from here?

300,000 new builds a year plus hundreds of thousands of retrofits. What are we going to use for heating? That is the big question!

Being sensible, currently infrared heating cannot replace 1.7 million gas boilers or 30,000 heat pumps. So, we have another crisis on our hands.

Government and others need to urgently review the current situation as heating costs have rocketed over the last few months and are about to rocket again up to £2800 a year for a domestic property.

We are now receiving enquiries for commercial and factory premises heated with gas, wanting to change from gas as they cannot now afford to heat their premises. No doubt it is the same with premises heated with oil.

It was our intention when we introduced www.heat4all.at products into the UK that we would concentrate only on the Smartline range for houses both new and old. However, times have changed over the last few weeks and we now feel that we need to introduce the Heat4all Iconic Heat Zone infrared heaters into the UK, to provide brilliant heat to commercial/factory premises. Please see below.

The introduction into the UK of these infrared heaters will resolve the heating problem for commercial/factory premises when the owners cannot or will not pay for the huge increase in gas and oil prices.

Heat4ALL ICONIC Heat Zone

See technical details below

Type	1800s	2400s	3200s
performance	max 1800w	max 2400w	max 3200w
voltage	210 - 250VAC / 50Hz		
power requirements	approx. 8 A	approx. 11 A	approx. 14 A
protection class	Protection class I		
Degree of protection	IPx4		
Dimensions	100*16.9*7.5cm	150*16.9*7.5cm	200*16.9*7.5cm
range of space	about 3 m		
heat-up time	about 10 minutes		
colour	black-and-white		
Weight	5kg	8kg	10.5kg
