

Bathroom Mirror Steaming Frustration

When the bathroom mirror is steamed up it is so frustrating. Your wonderful face cannot be seen in the mirror.

Fear not as we have the answer. In fact, we have had the answer for about six years now when first installing a heater mirror.

[Our Heat4All heater mirror.](#)

It not only lets you see your wonderful face all the time it also heats the whole bathroom. No other heating is required. You never need to have a cold bathroom again or a steamed up, frustrating mirror.
