

Beginners/ Resellers Guide to our brilliant Infrared heating

Infrared is the future of low cost and the most effective and efficient heating

Firstly, Keep it Simple. It does not have to be complicated

Genuine Infrared is all about providing people with the cheapest and most effective way to heat their homes, especially those in fuel poverty.

Our infrared heating Made in Austria by www.heat4all.at is the best quality infrared heating available anywhere in Europe

Heat4All infrared panels will heat any given area with a lower wattage than any other infrared product. i.e. 41 watts per square metre.

All of our panels can be individually controlled by a thermostat which is programable for up to 6 times a day over the whole week. It is also possible to control the panels via an App. through our Homematic system.

Heat4all manufactures two infrared systems namely Smartline and Iconic. Please view their website to get full details.

We decided five years ago to sell the Smartline system in the UK as it is more than effective and efficient for the UK market. It is also the less expensive infrared of the two systems and has a thickness of 16mms only against 21 mms.

The quality of the product is second to none. Having seen the product being made by hand in Vienna we can vouch for that. Every panel is also quality control checked and given a reference number before dispatch.

It comes with an Eight-year Warranty but has a life span of up to 40 years.

Absolutely no maintenance is required so a huge cost saving every year.

To become a Reseller with us all you need to do is show your interest via email.

We will provide you with all the detail you will require to sell to new customers and we will provide all the administration Free of Charge.

All you will have to do is provide us with the room sizes and ceiling heights and we will provide you, again Free of Charge, a specification for purchase and use. You will just have to add your margin to make a profit without your need to spend any money. It is that simple.
